limestone, terrazzo

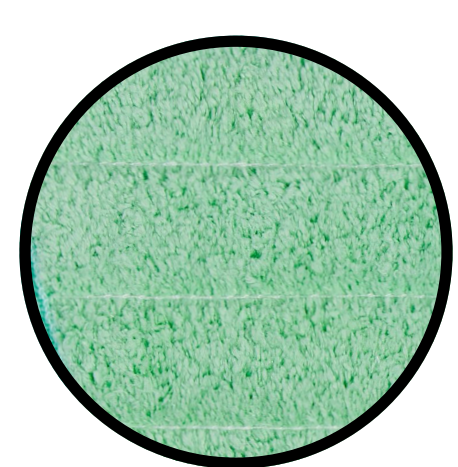

A couple of exceptions:

Oil / Waxed finishes

Oil or waxed flooring needs its own particular care, whatever you're cleaning with. Follow your manufacturer's instructions, and if in doubt, fill the mop bottle with plain water instead. Same mop, same pads, same technique

Pole

Every floor above works with your Spray Mop kit:
2 x Everyday Mop Pad and 3 x Deep Clean Mop Pad included.

Want more? Add the Dust Mop Pad for pre-clean
dusting, or the Grout Brush & Pole for grout lines.

The koh[®]

Floor Cleaning Guide

The Koh Spray Mop powered by Koh Universal Cleaner doesn't work like a mop and bucket, and that's by design. One single spray (1ml dose) covers a square metre. Universal Cleaner breaks the dirt down on contact. The pad lifts it straight off, so the floor is clean and dry in seconds rather than sitting wet.

top tips

1. Less is more

One trigger pull per square metre. Mop back and forth until the section is dry, then move on. Too much solution is the main cause of streaks and smears, so if you're seeing either, you're using more than you need.

2. Check your pad as you go

Keep an eye on the pad for soiling and wetness. A clean dry pad lifts dirt and solution off the floor. A wet, dirty one just pushes both around. Swap to a fresh pad for each room, or sooner if it looks like it needs it.

3. Mop storage

Remove the pad after every use and wash it. Never leave the mop standing on a used pad on your floor.

4. Not gliding?

Switch to the Everyday Pad, it has less friction than the Deep Clean Pad. Or add one more spray.

**clean without
the compromise**
